

MAKING APPLIANCES SMART

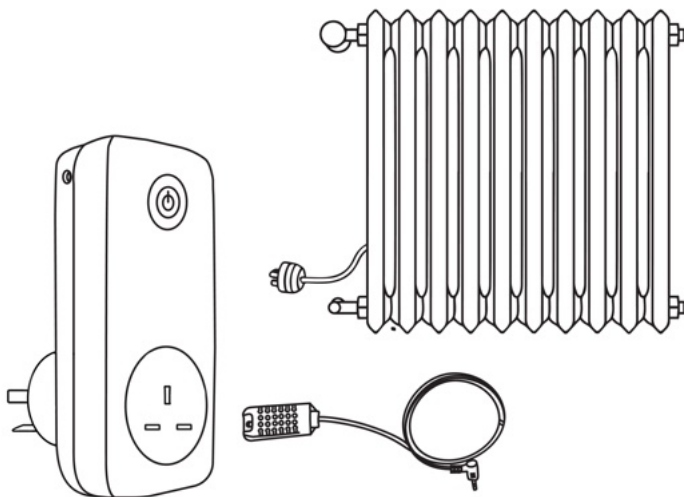

Your Next Generation Temperature, Humidity, and Air Quality Control!

Transform Your Appliances into Smart Devices with the Kiwi Warmer!

The ultimate add-on that turns your regular appliances into smart devices. Simply connect the Kiwi Warmer into a wall socket and plug your appliances into it to unlock a whole new level of control and convenience. With its user-friendly mobile app, managing your appliances has never been easier. Experience the ultimate control and efficiency with the Kiwi Warmer, a revolutionary all-in one device designed to enhance your living or working space. Say goodbye to uncomfortable environments and hello to a new level of comfort, energy management, and air quality awareness.

Temperature and Humidity Control

- **Optimal Comfort:** The Kiwi Warmer ensures your space is always at the perfect temperature and humidity levels, creating a cozy and inviting atmosphere.
- **Health and Well-being:** Maintaining the right temperature and humidity range is crucial for your health. Avoid issues like mould growth, respiratory problems, and discomfort caused by extreme conditions.
- **Energy Efficiency:** With precise control over heaters, coolers, humidifiers, and dehumidifiers, the Kiwi Warmer optimises energy consumption, helping you save on utility bills while enjoying a comfortable environment.

Energy Consumption Insights

- By monitoring energy usage, the Kiwi Warmer helps you understand and manage your energy consumption patterns, enabling you to make informed decisions for a more sustainable lifestyle.
- Combined with temperature, humidity, and air quality control features, the Kiwi Warmer offers a comprehensive solution for creating the perfect environment while making your appliances smarter than ever before.
- Upgrade your appliances and simplify your life with the Kiwi Warmer. Experience convenience, energy savings, and control at your fingertips. Get started today and discover a new level of smart living!

Air Quality Monitoring

- **Breathe Fresh Air:** The Kiwi Warmer goes beyond temperature and humidity control, featuring an advanced eCO2 air quality sensor. It constantly monitors the carbon dioxide levels in your environment, ensuring you breathe in clean and healthy air.
- **Real-time Monitoring:** The Kiwi Warmer features an advanced air quality sensor that continuously monitors the air in your space, providing real-time insights into the quality of the environment.
- **Health Protection:** High levels of carbon dioxide can lead to drowsiness, headaches, and poor concentration. The Kiwi Warmer empowers you to maintain optimal air quality, promoting productivity, alertness and overall well-being.

Quick Start Guide

- 1 Download the Kiwi Warmer app from the Apple or Google Play store.

- 2 Plug your Kiwi Warmer device into a wall socket.
- 3 Make sure your mobile device is connected to a 2.4 GHz WiFi network.
- 4 Start the app, select **Add new device**, and follow the app's instructions.

Supported Appliance Types:

Coolers

Heaters

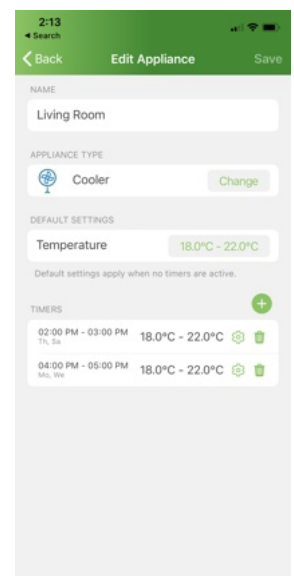

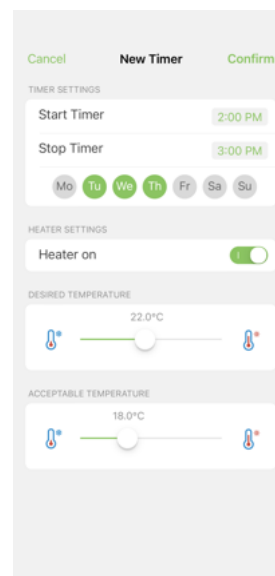

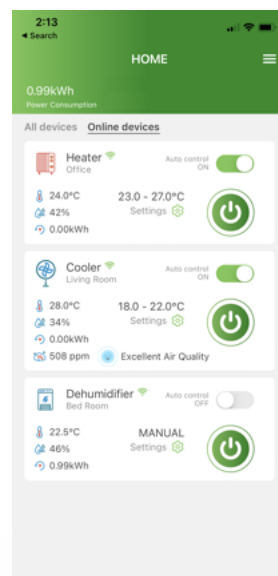

Humidifiers

Dehumidifiers

User Interface

Product Features

- Controls appliances based on Temperature and Humidity
- Built-in Energy Monitoring
- Built-in Air Quality Monitoring
- Easy plug-and-play setup
- Configurable timers
- Dashboard for all connected appliances
- User-friendly mobile app for Android and iOS
- Family Sharing

Technical specifications

- Wi-Fi: 2.4 GHz 802.11b/g/n
- Mains Voltage: 90 - 240V, 50/60Hz
- Current Rating: 10 - 16A
- Temperature Control: 10 - 35°C
- Humidity Control: 15 - 90% RH
- eCO2 Monitor: 400 - 65 000 ppm
- Power Meter Accuracy : 2.5W
- Mobile App Support : Android and iOS
- Product Dimensions 53 x 119 x 64 mm
- Weight: 140g

Output		Comment / Recommendation
eCO ₂ / CO ₂	Rating	
>1500	Bad	Heavily contaminated indoor air / Ventilation required
1000-1500	Poor	Contaminated indoor air / Ventilation recommended
800 - 1000	Fair	Optional ventilation
600 - 800	Good	Average
400 - 600	Excellent	Target

The product has been designed with the utmost concern for user privacy. It does not collect any personally identifiable information. While the mobile app may request permission to access location services, this is solely for the purpose of facilitating the pairing process between your mobile phone and the Kiwi Warmer. It is important to note that no location information is stored either on the Kiwi Warmer itself or in any cloud-based servers.
